

AI 4 ERP WORKSHOP

Move beyond the AI Hype and build an actual AI Application in this hands-on workshop designed for Mid-Market ERP Users

WHERE

WHEN

AGENDA (4 HOURS TOTAL)

- **Short Introduction**
- **Build** a personal calorie-tracking app using ChatGPT and Airtable
- **Practice** using the app together
- **Learn** the difference between backend, front end, and other pieces of the software architecture
- **Break into groups** and build AI ERP prototype examples using the skills learned
- **Discuss** how to apply what we learned at work

PREREQUISITES

- **A laptop** and charger
- **A desire** to learn
- **A desire** to have fun
- **Experience using a Mid-Market ERP** system like Acumatica, Epicor, Infor, NetSuite, Sage, SAP Business One, Syspro, etc.
- **No technical knowledge needed**
- **Target Audience:** ERP Users, Consultants, Accountants, Operations Leaders, etc.

FAQ

- **Is it really free?**
Yes, but registration is required and tickets are limited
- **Is this for a specific ERP?**
No, this is for all Mid-Market ERPs
- **What should I bring?**
Your laptop and ideas for use cases for AI at your company
- **How long is this workshop?**
4 hours long
- **Is lunch provided?**
Yes, lunch is provided

TAKEAWAYS

- **Your own personal calorie tracking app** that you own and that teaches you the fundamentals of building an AI application
- **The skills to build an AI prototype** for any use case you can imagine at your company
- **The opportunity to compare ideas** with other ERP Professionals and the time to collaborate on building an AI ERP prototype together
- **Clarity on what AI is** and what it's not
